## Coal Oil Point Reserve

Enter Rating (0 - 5)

Unrated

Surfs up! Coal Oil Point Reserve is fantastic surfing beach and is generally more private than some other Isla Vista beaches. Located about 2 miles from campus, Coal Oil Point Reserve is a scenic beach from which visitors get a view of the beautiful mountains. Importantly, the reserve also contains and protects many important natural habitats, including tidal lagoons and coastal dunes containing many rare forms of wildlife. Thus, it's a fantastic place for field research in environmental science and marine biology.
